

THOMAS JOSEPH

Tampa, FL | 8134517308 | thomas.joseph19@outlook.com | www.linkedin.com/in/thomas-joseph-5a01072a7/

EDUCATION

University of Central Florida

Expected Grad: May 2029

Bachelor of Science in Mechanical Engineering

Bachelor of Science in Applied Mathematics

GPA: 3.9

Hillsborough High School International Baccalaureate

Graduated May 2025

International Baccalaureate Degree

GPA: 6.8

EXPERIENCE

Founder

Tampa Bay Model United Nations

January 2022 – Present

- Facilitated a team of 5 other individuals to create a local Model United Nations conference to give opportunities to students in my local area.
- Raised over \$10,000 over two years to fund the project
- Managed 2 annual committees, coordinated 10+ staff members, and oversaw 2 full-day conferences, providing hands-on leadership and logistical experience

Research Intern

Michigan State University

June 2024 – July 2024

- Gained hands-on experience in gamma spectroscopy and nuclear data analysis
- Operated and calibrated 2 high-purity germanium (HPGe) detectors, improving signal-to-noise ratio by 15% through optimized signal processing
- Applied particle identification techniques to analyze 1,000+ recorded events, strengthening accuracy in nuclear event classification

SKILLS

- Java, C, Python
- CAD modelling
- MS word, MS Excel, MS powerpoint

PROJECTS

Project Horizon – AIAA@UCF

- Collaborating on the design, simulation, and testing of a high-powered rocket targeting an altitude of 45,000 feet to capture imagery of Earth's curvature
- Supporting the propulsion team in motor performance modeling, safety verification, and thrust optimization, ensuring compliance with AIAA and NAR standards

Software Developer | Soccer Team Operations Tool (GoalPro)

- Developed a custom Java-based application to automate administrative workflows for a competitive soccer team, reducing manual data entry by approximately 50%.
- Integrated a SQL database (using JDBC) to track seasonal scoring trends, player availability, and match statistics, ensuring high data integrity and persistence.
- Designed and delivered a streamlined UI tailored to specific stakeholder requirements, enabling real-time roster adjustments and automated performance reporting.
- Stack: Java, SQL (SQLite/MySQL), Swing/JavaFX.

Boat Design - UCF

- Fabricated a functional prototype boat in a team-based engineering project.
- Integrated basic electrical components into the boat system while applying mechanical design principles for buoyancy, stability, and weight distribution.

- Collaborated with teammates to test, troubleshoot, and refine the boat's mechanical structure and electrical functionality for improved performance.

Certifications

- MS technology Associate - Granted August 2023
- High Powered Rocketry Level 1 Certification – Granted November 2025
- Engineering Job Simulation – British Airways – Granted January 2026
- AI fundamentals: Foundations for understanding AI – International Business Machines – April 2026
- Data Literacy – International Business Machines – April 2026
- Build your own ChatBot - International Business Machines – April 2026
- Data Science 101 - International Business Machines – April 2026
